

## PROMIS / VMS System Management Labs

In this 2 day lab class, you will practice PROMIS management skills for a variety of basic and exceptional situations, including database disaster recovery, dual machine takeovers, and database archives.

Half of the labs are detective work. You will be presented with a broken or troubled PROMIS system and be asked to diagnose and repair it.

You will also participate in a discussion of some advanced PROMIS tuning techniques and the basics of PROMIS database upgrades, including the High Availability or TLOG convert.

### Prerequisites

- Basic Understanding of PROMIS
- Basic Understanding of VMS
- PROMIS System Management Class

### Who Should Attend
