

PROMIS SPC GUI

This 1/2 day course will develop your skills in using the SPC GUI for PROMIS through a combination of lecture and hands-on examples. You will learn to use the graphical user interface to manipulate PROMIS charts and charts that are stored in a local database.

You will also learn how to view chart statistics, customize plot elements and individual chart displays according to your preferences, as well as how to open, change, save and file chart data in a Microsoft Excel/Access database.

Prerequisites

- Experience with PROMIS Data Collection
- Knowledge of ASPC charts
- Knowledge of engineering analysis at your site
- Experience with Microsoft Excel and Access preferred

Who Should Attend

- Process Engineers
- Product Engineers
- Technicians
- Those interested in SPC analysis and control process information

What You Will Achieve

- Use of SPC GUI as an online analysis tool
- The ability to display and manipulate SPC Charts
- Use of SPC GUI as an offline analysis tool

Topics

- The SPC GUI Environment
- Reviewing Charts and Control Limits
- Viewing Charts and Plots
- Adding Comments to Charts
- Customizing Plot Elements
- Analyzing Data
- Offline Analysis
- Alias Tracking
